

7 Reasons to choose *Home Vision Blinds*

- 1 Factory direct prices – buy direct from a wholesaler.
- 2 We have been manufacturing and supplying Auckland with blinds for nearly three decades. 60,000 customers can't be wrong!
- 3 We can organise installation, or you can save by fitting the blinds yourself. It's straightforward (we send concise installation instructions). Delivery is by courier throughout the North Island.
- 4 Avoid traffic jams – our on road sales team can come to Auckland clients for a free measure and quote.
- 5 Good turnaround time, because we carry a wide range of stock in our core range of 20 popular and timeless neutral colours. These are complemented by a number of brighter fashionable, 'accent' options. Visit our showroom to see the full range of swatches.
- 6 A 5-year warranty backs all our products, demonstrating our commitment to providing a quality product that is good value-for-money.
- 7 Friendly service. We're 100% New Zealand owned, and all our blinds are made in New Zealand in our East Tamaki factory.

Contact Home Vision Blinds, Auckland's leading blinds suppliers for new home builds, renovations and commercial clients. Make an appointment to view the full range, or complete the online enquiry to book your free measure and quote.

Why Pay More?

Get factory-direct prices by buying from Home Vision Blinds. We wholesale nationwide and deliver to commercial clients and home-owners throughout the North Island, direct from our East Tamaki factory.

- Enjoy the space-saving convenience of roller blinds (with options for block out, thermal, and motorised operation)

- Get the ultimate glare control from sunscreen roller blinds that won't obstruct your view

- 25mm or classic cut 50mm venetians allow variable light control (classic width also available in the natural warmth of timber)

- Vertical blinds are the practical and economical solution for rentals, sliding doors and angled windows.

Whether you're renovating or building, creating ambience or privacy, blinds give your home or office a contemporary finish. From reducing glare to blocking out light completely, Home Vision Blinds offer a wide range of blinds to suit residential, commercial and educational environments.

0800 Blinds

Residential • Commercial • Educational

Roller blinds

Roller blinds are our biggest seller. Completely versatile, they can be used both in contemporary homes, older properties, renovations or commercial settings to give a contemporary feel. Although they're low-maintenance and simple to operate, different fabric weights allow degrees of privacy and light control. Our core range of 20 popular and timeless neutral colours are complemented by a number of brighter fashionable, 'accent' options. All roller blinds are coated with polyester, which seals and protect the blinds against mould and condensation, especially important in bathrooms and kitchen areas.

Sunscreen roller blinds

Home Vision sunscreen blinds are an ideal choice to reduce glare at home or in the office, while also protecting your furniture, floor coverings, valuable artworks and books from harmful UV rays. Available in two weights, the Sunfilter weight offers more privacy, with only shadows visible from outside, whereas the Sunscreen weight offers a more transparent weave that allows you to enjoy the view through your window.

Vertical blinds

Vertical blinds are an economical choice and popular for floor to ceiling windows or doors, as well as rental properties due to the ease of repairing or replacing damaged slats. Vertical blinds are also practical for angled windows as they can be cut to fit. Mould and fire-resistant, Home Vision vertical blinds are manufactured to the highest standard from the same range of fabric as roller blinds, in a wide range of colours and textures. They feature a self-aligning heavy-duty aluminium track and smooth, synchronized vane action.

Roller blinds can be operated by sidewinder chain, traditional spring or, for the ultimate in control for those hard-to-reach places, we can supply motorised blinds operated by battery-run remote control devices. The thermal-backed roller blinds have impressive insulating properties, keeping your home cool in the summer and warm in cooler months. Roller blinds are available in three fabric density options: blackout, sunscreen or sun-filter.

- Motorised • Springloaded
- Treated for moist environments

Venetian blinds

Traditional aluminium Venetian blinds offer a tried-and-tested way of controlling interior light intensity – and also how much the outside world can view of your private spaces. Venetians are available in two chic blade widths: a 25mm or a more classic 50mm. Aluminium Venetian blinds come in an impressive range of stylish modern colours. The great advantage of Venetians is that you can vary the angle of the blades to block out both glare and prying eyes, but reinstate your favourite vista at the flick of a cord. Venetian blinds are popular for home, office and educational installation.

Wooden & Composite Venetian blinds

For a natural, warm look and feel, Home Vision wooden venetian blinds will perfectly enhance any room in your home. Made from the highest quality wood – our timber venetian blinds have a rich grain and texture which is easy on the eye. Or, you can get a painted timber look with "Vision Wood" venetian, (a recommended option for areas with moisture such as kitchens or bathrooms).

Home Vision wooden venetians are available in a natural wood colour or the Vision Wood" painted-effect colours of white and Alabster. The water-resistant Vision Wood" blinds are heavier, but will not crack, fade or warp in wet areas.
